

**1939 Stinson HW75 '105'**  
**AIRCRAFT SPECIFICATIONS**  
**N-Number: N99992 S/N: 7195**

One of perhaps a dozen flying examples worldwide, this amazing piece of history reflects the glory of the Golden Age of Aviation - the Stinson HW75 - Stinson Aircraft's first 'small' aircraft. Marketed as the '105' for its speed, it was the height of personal air transportation - with owners like Howard Hughes and Jimmy Stewart. Ours has benefited from extensive care over the past 18 months: we've worked to turn it into a super fun and original artifact of American aviation. Bumpy landings and seeping with nostalgia! Ready for a new owner to safeguard it for the future.

**Engine: 636 Hours SMOH**

**Avionics**

Primary Flight Instruments

- Airspeed
- Altimeter
- Turn and Bank
- VSI
- Wet Compass
- Oil Temperature
- RPM/Tach

**UPDATES:**
