

1992 Staudacher DC-11 Amphibious Floatplane

AIRCRAFT SPECIFICATIONS

N-Number: N327MS S/N: 11

This Staudacher DC-11 Amphibious Floatplane is a remarkable on-of-a-kind experimental category airframe that was designed and built by the noted aircraft-builder Jon Staudacher. Reported to fly with the feel of a Super Cub but with a hefty O-320-D cruises "faster than a Cherokee". As an experimental, it can be converted to conventional landing gear as well. A unique and fun aircraft that outperforms a Super Cub at a fractions of the price!

Airframe: 448 Hours
Engine: 448 Hours SMOH

Avionics

Icom IC-A210 Comm
Appareo Stratus ESG Mode S Transponder
- ADS-B Out
- Stratus 3i ADS-B In
Pilot PTT on Stick
